

Dimsy Carbuccia-Donoso

Software Engineer

From concept to creation, I bring Ideas to life through code

EXPERIENCE

Full Stack Engineer
Easy Simple SEO

July 2023 – Present
Montreal, Quebec

- Developed custom solutions based on client needs, using various tech stacks (**Node.js**, **Next.js**, etc...), and leveraging **AWS EC2** and **Docker** for scalable hosting and efficient containerized deployment.
- Created and improved internal tools, and APIs for data collection and analysis to streamline in-house data evaluation and decision-making with **Node.js** and **Python**.
- Consulted and advised clients on best practices, emerging trends, and suitable technologies for scaling and developing modern, efficient, and maintainable solutions.

Software Engineer, Intern
Axya

January 2021 – August 2021
Montreal, Quebec

- Engineered end-to-end solutions using **Python/Django** and **JavaScript/React**, driving projects from design to deployment while adhering to **TDD** principles.
- Implemented third-party integrations and **REST APIs** to automate processes for the finance and customer care departments.
- Enhanced the **DevOps** pipeline by containerizing applications with **Docker**, integrating automated linting, and migrating dev and staging environments to **PostgreSQL**, improving debugging, testing, and deployment efficiency.
- Directed **Agile** sprints, defining requirements, feature specifications, and user stories, ensuring clear communication and alignment within the team.

Engineer, Co-Op student
Bell

September 2020 – December 2020
Montreal, Quebec

- Developed and deployed client-requested features across multiple applications using **JavaScript/Ember.js**, and **jQuery**, enhancing functionality and ensuring on-time delivery.
- Built an employee training portal featuring a custom **JavaScript/Ember.js** interface and a **C#/NET Entity Framework** video system to streamline the delivery and management of training content.

Full Stack Developer
Grad4 (now Axya)

April 2019 – May 2020
Montreal, Quebec

- First hire, and key contributor in the design, development, and deployment of an **MVP** using **Python/Django REST & Javascript/React**, resulting in the acquisition of early investors and clients.
- Elevated team development and coding standards by mentoring junior developers through code reviews, workshops, and pair-programming.
